Aquatic Department Newsletter

7 Week Fall Session 2022

## Important things to Remember for Swim lessons

- Understand your child's ability.
- Get to know your child's instructor.
- Communicate if your child has special circumstances or needs.
- You and your child must know and follow all safety rules at the Y.
- Swim lessons are a learning process, your child might not advance to the next level every session.

### Bathroom Breaks During Lessons

If your child is able to get themselves to the locker room to use the bathroom independently, you are welcome to leave the pool deck during lessons. We ask that you do remain in the Y.

If your child needs your assistance to get to the bathroom, we ask that you please stay on the pool deck during lessons.

### Illness Policy

If your child is running a fever or sick, please stay home from swimming lessons.

### No Open Swim Before Lessons

If your child is under the age of 7, they are not allowed to be in the pool by themselves at any time according to facility policy. This rule applies all the way up until when lessons begin at 4:30pm. If you would like your children to have time to swim before lessons, and they are under the age of 7, we ask that you please accompany them in the water.

### Policy for One Child in Class

Due to low enrollment and frequent absences during summer, there may be times when your child is the only child in class. On these occasions, the lesson will be run like a private lesson and therefore last only 20 minutes.

### Family Swim Night\*

Families are welcome to join their swimmers in the water on the last class of the session. We will have the slide and mushroom on for the second half of class for some good family fun in the water.

### Questions, comments, or concerns?
