CIRCUIT

Combine fun and fitness to increase cardiovascular and muscular endurance with a standing circuit workout. This strength training class for the upper and lower body uses handheld weights, elastic tubing with handles, bodyweight exercises, and a ball, alternated with non-impact aerobic choreography. A chair is available for support, along with stretching and full relaxation in a comfortable position.

CHAIR YOGA

Chair Yoga moves your whole body through a complete series of seated and standing yoga poses. Chair support is offered to safely perform a variety of postures designed to increase flexibility, balance, and range of motion. Restorative breathing exercises and final relaxation promote stress reduction and mental clarity.
